CutPRO® Cut Resistant Clothing

CutPRO® is a truly innovative brand of high performance cut resistant workwear, designed to offer reliable, ultra-durable and thoroughly field-tested cut protection to professionals in the glass and metal industry.

Our products take cut resistant clothing to a whole new level. Made from our very own specialist fabric Cut-Tex® PRO all garments offer outstanding levels of cut, tear, abrasion and puncture resistance, while being durable, lightweight and comfortable.

Used across the CutPRO® range, our highly acclaimed fabric provides the best possible defence against cuts and lacerations and offers workers personal protection they actually will want to wear.

All of our protective garments are fully CE marked and offer ANSI/ISEA 2016 Level A5 and according to the latest EN 388:2016 standard Blade Cut Resistance Level E, as well as the highest levels of puncture and tear resistance, according to EN 388:2016.

According to the previous EN 388:2003 Standard CutPRO® Cut Resistant Clothing offers Cut Level 5.

Why Choose CutPRO®?

- High quality cut resistant clothing is essential in glass and metal handling. Cuts and lacerations can cause rapid blood loss, infection, permanent damage to soft tissues, and even death.
- Not only do manual handling incidents cost firms time and money, they highlight a serious failure in employers’ duty of care, which can lead to reputation loss, and even criminal prosecution.
- Cheaper alternatives are likely to offer inferior protection, costing you more in replacements and compromising safety.
- Not all cut resistant products offer high levels of tear, puncture or abrasion resistance: significant additional factors for safety.
- It is lightweight, comfortable and fully washable, making it a practical solution to personal protection.

The handling of flat glass, sheet metal or other sometimes sharp raw or engineered materials involves the risk of serious personal injury. Serious accidents continue to happen especially in premises where these materials are being handled and processed manually. In such cases and environments, appropriate protective clothing should be worn at all times.

I strongly believe we can deem CutPRO® Cut Resistant Clothing as appropriate. It can effectively help reduce the risk of cut injuries, and it can be customised to reflect the customer’s unique operational risks, responsibilities, branding and design preferences.

CutPRO® Cut Resistant Clothing is the result of extensive research and contribution from health and safety professionals of leading flat glass and sheet metal processing companies.

Robert Kaiser, CEO

Important Information

• Do not use this product for protection from high speed or serrated blade
• Do not use this product near moving machines or where there is a risk of entanglement
• Do not use this product for food processing
• This product is designed to minimise the risk of injury from potential hazards in the industrial work space (abrasions, cuts, tears and puncture)
• This product is used only for the designated purpose, no item of PPE can provide full protection
• This product is not designed to protect the hands, gloves are to be worn when required
• This product does not protect from hypodermic needles or similar sharp pointed objects
• Care and attention must always be taken when carrying out potential hazardous activities
• Cut-Tex® PRO is an ultra-high performance cut resistant fabric. However, it is not completely cut proof.

Maintenance

• Do not wear this product if damaged, always inspect prior to use
• Do not leave in a contaminated condition, launder immediately
• When not worn, store this product in cool dry conditions away from direct sunlight
• Wash dark colours separately
• Do not wash with fabric conditioner
• Reshape whilst damp
