

March 28, 2014

It is my sincere pleasure to be able to provide future customers and associates of PPSS Group with my unreserved recommendation.

St. Albert Fire & EMS selected PPSS Group to be our provider of stab resistant vests due to their comfort and protection levels. Aside from providing superior protection from edged weapons and hypodermic needles, they also provide protection against blunt force trauma injuries caused from being punched, kicked and struck with heavy objects. I know of no other stab resistant vest that matches the specifications of the PPSS vest.

In today's tough economic climate cost is always a factor and the PPSS KR1 Stab Resistant Vest is cost effective. This is due to the fact that unlike Kevlar® vests, which have to be replaced every 3 to 5 years, the PPSS stab resistant vest has an unlimited shelf life and therefore we will not have to incur the same or greater replacement costs in the future.

In addition, the customer service provided by PPSS Group, led in North American by Bill Geraghty, President of their North American operation, has consistently met or exceeded our expectations.

Sincerely,

Bernd Gretzinger  
Deputy Fire Chief | Logistics  
City of St. Albert Fire Services
